Presents

LaVone Sterling

Half-day Workshop

Fascinated by morning and evening light, I chase its ever-changing shadows, trying to capture it's intoxicating emotion.

Bringing Life Into Your Landscape

Our focus for this workshop is to bring life into your pastel landscape by using light and stirring emotion. Emphasis is on simplifying the design, eliminating detail and portraying a visual message. We will be painting from photographs. Bring a reference photo where the light is prominent. (The instructor will also bring extra reference photos for your use.) We will be concentrating on

developing good composition, dramatic values and marking techniques. There are many underpainting methods, but for this workshop we will be doing a watercolor underpainting.
